

Fig. 1

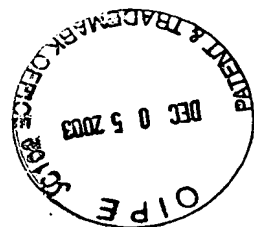

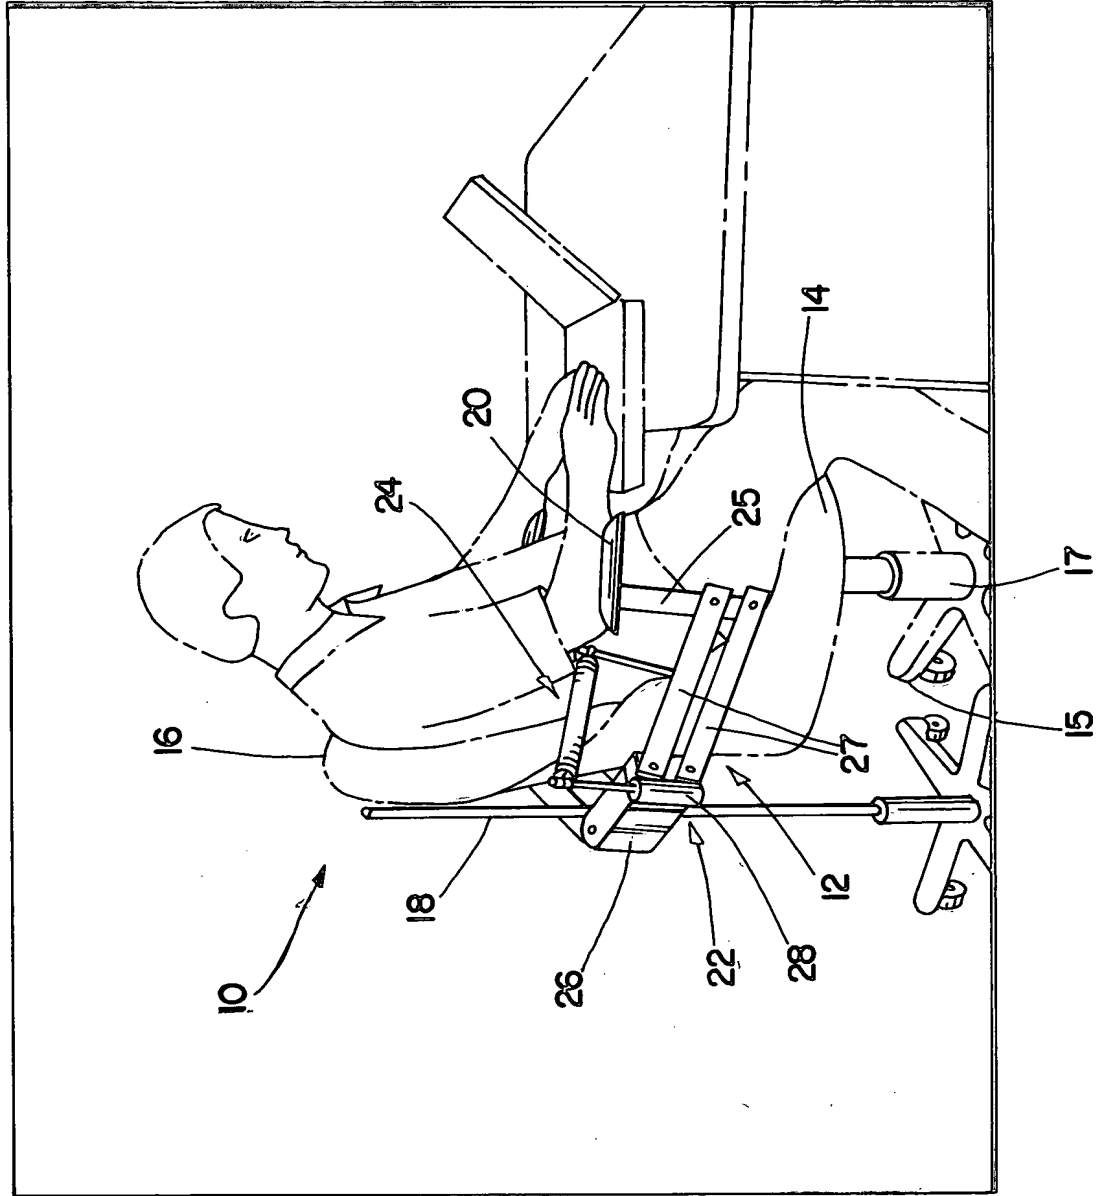

FIG. 1 is a perspective view of a person sitting in a chair, illustrating the overall structure and components of the invention. The person is seated in a chair with a backrest (16) and a seat (14). The backrest is supported by a frame (18) and is adjustable. The seat is supported by a frame (12) and is adjustable. The chair is shown in a side view, with the person's hands resting on their knees (20). The backrest is labeled 16, the seat is labeled 14, the frame is labeled 18, and the person's hands are labeled 20. Other labels include 10, 12, 15, 17, 22, 24, 25, 26, 27, and 28, which point to various parts of the chair and the person's body.
